(54) Title: A METHOD OF DETERMINING FEEDBACK IN A COMMUNICATION SYSTEM

WO 2004/042988 A1

(57) Abstract: A method of determining feedback in a communication system, wherein data is transmitted from a transmitter to a receiver, and in response to data reception at the receiver, feedback is generated based on the received data comprising the step of classifying the data into data entities of different levels of importance and the step of determining feedback based on at least one data entity of one level of importance. The invention further relates to a corresponding receiver, transmitter and a respective communication system.
